

# **Commuter Rail System Station Boarding/Alighting Count**

## **SUMMARY RESULTS**

### **Spring 2014**

Division of Strategic Capital Planning

**Revised December 2014**

This report was prepared in cooperation with the U.S. Department of Transportation, Federal Highway Administration, Federal Transit Administration, and the Illinois Department of Transportation. The contents reflect the views of the author who is responsible for the facts and accuracy presented. The contents do not necessarily reflect the official views or policies of IDOT or U.S. DOT. This report does not constitute a standard, specification, or regulation.

## Spring 2014 Commuter Rail System Weekday Station Boarding/Alighting Count SUMMARY RESULTS

This report summarizes results of the Metra station passenger boarding/alighting count taken during the spring of 2014, and is intended as a companion to the separate train count tabulations report.

Metra uses several primary data sources to measure commuter rail ridership. Passenger travel by month is estimated on the basis of ticket sales. Standard trip-rate factors are applied to sales of each ticket type to convert ticket information to passenger trips. Since this data is collected at the fare zone level, it is possible to determine where travel has been made, but not when. Another source is conductor passenger load counts of trains entering and leaving downtown stations. This information serves to measure when passenger travel occurs, but not where. To answer the question of where and when Metra service is used, a census of an entire rail line's ridership for a given weekday is taken on a periodic basis. This Spring 2014 count is the most recent such census.

This 2014 project involved use of survey personnel positioned at the entranceway of each revenue car, or on station platforms if more efficient. Most trains for a given rail line were counted on a single weekday with the exception of the Electric District, BNSF Railway, Union Pacific-West, and Milwaukee District-North lines, where counts were spread over multiple weekdays. Weekday counts were performed on Tuesdays, Wednesdays, and Thursdays only. Counters recorded the number of passengers boarding and alighting at each station stop on pre-coded forms that were later keyed and computer processed. (The South Shore Line trains of the Northern Indiana Commuter Transportation District were not counted.)

The Spring 2014 Commuter Rail System Weekday Station Boarding/Alighting Count (2014 count) was managed by an outside contractor, who was responsible for recruiting, training, scheduling, and

supervising count personnel and for data entry. Analysis was performed by another outside contractor that is familiar with Metra ridership patterns. A detailed examination of the 2014 count by the contractors and Metra staff led to recounts being made on a few trains. Particular attention was given to the Route 59 and Naperville stations on the BNSF line. In this area, ongoing highway construction during the 2014 count process may have diverted some regular riders away. Future counts will likely confirm or refute this effect.

For the 2014 count, most trains were counted on these dates:

<u>Line</u>	<u>Abbr.</u>	<u>Count Date</u>
Electric	Elec	Tuesday-Wednesday-
South Chicago Branch	Elec-SC	Thursday, April 22-24
Blue Island Branch	Elec-BI	
Main Line	Elec-ML	
Rock Island	RI	Thursday, March 13
SouthWest Service	SWS	Thursday, March 20
Heritage	Her	Thursday, April 10
BNSF Railway	BNSF	Tue.-Wed, April 15-16, & Thursday, May 1
Union Pacific-West Line	UP-West	Wednesday, April 9, & Thursday, April 17
Milwaukee District-West Line	Milw-W	Tuesday, April 8
Union Pacific-Northwest Line	UP-NW	Wednesday, March 19
Milwaukee District-North Line	Milw-N	Tuesday, April 1, & Thursday, May 29
North Central Service	NCS	Tuesday, March 11
Union Pacific-North Line	UP-N	Wednesday, April 2

Overall, the accuracy of the information was judged good for the specific day(s) of each line's count. However, the validity of the counts

as being representative of how riders "typically" use the service is somewhat more difficult to gauge. A one-day count, as opposed to averages derived from multiple observations, is more susceptible to random variations due to factors like weather, traffic conditions, day of week, and time of year. For example, the 2014 count was conducted in the spring, during which ridership is consistently lower than during the fall months. Given that no other data source presently exists which breaks passenger use down to the station stop/train level, most users of this report will need to assume that the data is representative of ridership patterns.

Schools throughout northeastern Illinois schedule prolonged breaks in the spring, and the timing of these breaks varies greatly. The survey team mostly succeeded in counting on each Metra line while nearby schools were in session. The readily available posted schedules for the public school districts and the Catholic diocese schools were reviewed. However, the following three lines were counted during the March 31<sup>st</sup> to April 4<sup>th</sup> spring break week at the nearby listed public high schools and area grammar schools:

Milw-W (on Tuesday, April 3):

- Fenton High School, and grammar schools
- Lake Park East & West High Schools, and grammar schools
- Leyden East & West High Schools and grammar schools

Milw-N (on Tuesday, April 1) and UP-N (on Wednesday, April 2)

- Deerfield High School, and grammar schools
- Highland Park High School, and grammar schools
- New Trier High School - Northfield & Winnetka, and grammar schools

System counts of similar coverage have been taken previously, including Spring 1983, Spring 1985, Fall 1987, Fall 1989, Fall 1991, Fall 1993, Fall 1995, Fall 1997, Fall 1999, Fall 2002, and Fall 2006.

The summary count results in this report are organized according to six topical areas. A listing of each exhibit is provided below, including a short description of table format and content.

## **Exhibit I**

### **Rail Line Ridership Statistics**

a. Line Boardings by Distance from Downtown page 1

Provides rail line boardings aggregated by distance from downtown for 2006 and 2014. Note that the 2006 count occurred in the fall, while the 2014 count occurred in the spring. In 2006, the March, April, and May (spring) total ridership was 5% lower than the September, October, and November (fall) total, based on 2006 ticket sales. Overall, the 2014 count is 5% less than the 2006 count but consistent with what would have been expected if the 2006 count had occurred in the spring.

b. Total AM Boardings by Area and Rail Line page 2

This table summarizes boardings on inbound trains arriving, and outbound trains departing, downtown terminal stations between the start of service and 11:59 AM. Line counts are arrayed according to nine geographical areas based on station location. This exhibit is intended to provide a general correlation between commuter rail use and area of residence.

c. Weekday Ridership Statistics by Rail Line page 3

Provides rail line ridership figures according to three measures, including: total passenger trips, intermediate passenger trips (i.e., trips that neither begin or end downtown), and passenger miles (i.e., combined distance of all passenger travel). For each measure, breakdowns are provided by direction of travel and time-of-day. Criteria for time-of-day are based on the following table:

	<b>Inbound Trains Arriving Chicago</b>	<b>Outbound Trains Departing Chicago</b>
AM Peak	Start of Service - 9:15 AM	Start of Service - 9:15 AM
Midday	9:16 AM - 3:29 PM	9:16 AM - 3:29 PM
PM Peak	3:30 PM - 6:45 PM	3:30 PM - 6:45 PM
Evening	6:46 PM - End of Service	6:46 PM - End of Service

**Exhibit II**  
**Weekday Station Boardings and Alightings** pages 4-10

This table summarizes the total number of passengers entering and leaving stations by direction of travel. Also included are the total AM boardings for each station, that is, all passengers boarding a train from start of service day until 11:59 am. The table also includes transfer activity as well as the rank of outlying stations (i.e., Metra stations located outside of downtown Chicago). For stations which are served by multiple lines, the rank is based on the combined Metra ridership.

**Exhibit III**  
**Weekday Station Boardings Over Time** pages 11-16

This exhibit includes station results from twelve counts conducted since 1983. Stations are listed by rail line in descending mile post order. Counts for stations closed over the twenty-three year period are also provided.

**Exhibit IV**  
**Weekday Station Boardings and Alightings by  
Time-of-Day and Direction** pages 17-22

This table breaks down Spring 2014 station ridership by time-of-day and direction of travel.

**Exhibit V**  
**Non-Downtown Metra Stations Ranked by Total  
Weekday Boardings** pages 23-25

Stations are ranked in descending order of total Spring 2014 Metra boardings. Stations served by more than one line are ranked according to the combined Metra ridership.

**Exhibit VI**  
**Downtown Stations**

a. Downtown Station Boardings Over Time page 26

Boardings over time are presented for each of the five downtown stations, including breakouts by rail line.

b. Downtown Station Boardings and Alightings  
by Service Period page 27

Spring 2014 downtown station ridership is presented by time-of-day and direction of travel.
