

Architectural/Engineering Statement of Quality Control

**Completion of Quality Control Review
for**

RID Bridge Rehab

Project Name

AA-9876

Metra Project #/ PPN:

K12345

Contract #:

1

Task #:

ABC Company has completed the construction documents associated with the final submission for the ***RID Bridge Rehab***.

The signatures below confirm that an internal Quality Control (QC) review has been completed for the subject documents in accordance with Metra's Third Party Contracts Quality Management Plan (TPCQMP). All comments and findings resulting from the QC review have been resolved.

The QC review has been conducted on all phases of design, constructability, operability, maintainability and checking as defined in Metra's TPCQMP. During the QC review, compliance with the established policy principles and procedures, utilizing justified and valid assumptions, was verified. This included the review of assumptions, methods, procedures and materials used in analyses; the alternatives evaluated; the appropriateness of data obtained; the reasonableness of results; and the verification that the construction documents meet Metra's needs consistent with municipal codes and existing Metra standards. All Metra comments on previous submittals have been incorporated into the subject documents or otherwise addressed.
